

BAQSIMI DISCUSSION GUIDE

Are you prepared for a low blood sugar emergency?

If you are on insulin, you could experience a low blood sugar emergency, even if you haven't experienced one in the past. A low blood sugar emergency can happen anytime, anywhere. That's why it's important to be prepared and to have a rescue plan in place before an emergency happens.

Click on the icons to select symptoms you have experienced, and share this with your doctor to help create a rescue plan.

Other: _____

Have you ever experienced a low blood sugar emergency where you might have needed another person's help to recover?

Was there anything from the online quiz that you wanted to discuss with your doctor?

Share this with your doctor and ask if BAQSIMI is right for you.

BAQSIMI is a medicine used to treat severe low blood sugar. This is called severe hypoglycemia. It is used in adults and children 4 years and older that take insulin for diabetes. It is used when the person is unable to swallow sugar. Always read and follow the label.
